TEST PLAN – Zoho HRMS Application

1. INTRODUCTION

This Test Plan defines the overall testing strategy, approach, scope, resources, environment setup, risks, and execution schedule for validating the Zoho HRMS Application.

The objective of this document is to ensure that all HRMS functionalities—Employee Management, Attendance, Leave, Payroll Integration, Recruitment, Performance, and Self-Service—are tested thoroughly to meet functional, non-functional, integration, usability, and compliance requirements.

2. TEST OBJECTIVES

- Objective 1: Verify that all Zoho HRMS modules operate as per the approved business and functional requirements.
- Objective 2: Validate employee lifecycle operations such as onboarding, profile management, attendance, leave, and performance.
- Objective 3: Ensure seamless integration with Payroll, Finance, and Attendance modules (e.g., Zoho Payroll, Zoho Books, biometric systems).
- Objective 4: Confirm role-based access controls, security, and data privacy are enforced correctly.
- Objective 5: Validate accuracy of HR analytics, dashboards, and reports.
- Objective 6: Ensure system stability, performance, and user experience meet organizational expectations.

3. TESTING SCOPE

In-Scope

- Employee profile & lifecycle management
- Attendance & shift management
- Leave policy configuration & leave approval
- Performance management (Goals, Appraisals)
- Time tracking & timesheets
- Zoho Payroll integration for salary processing

TEST STRATEGY – HRMS Application

1. INTRODUCTION

Test Strategy document defines the overall testing framework, approach, methodologies, responsibilities, environments, and risk controls for the HRMS Application Project.
The purpose of this strategy is to ensure that the HRMS system is validated for functionality, integration, reliability, performance, and security before release.

2. BUSINESS BACKGROUND

The HRMS Application is designed to automate and manage employee lifecycle processes including onboarding, attendance, leave management, payroll integration, performance appraisal, and reporting.
The system supports multiple employee types, organizational policies, and compliance requirements.
Accuracy, data security, and seamless integration with other enterprise systems are critical to ensure operational efficiency and regulatory compliance.

3. TESTING GOALS & OBJECTIVES

Goals

- Ensure accurate employee data management and process automation.
- Validate compliance with labor laws and company policies.
- Confirm integration with Payroll, Attendance, and Finance systems.
- Ensure a secure, stable, and user-friendly HRMS environment.

Objectives

- Identify functional, integration, usability, and performance defects.
- Validate end-to-end HR processes including onboarding, leave, and appraisal.
- Ensure system reliability during peak usage periods.
